

ANALYSIS OF DIVORCE IN TURKEY

By Bugra Teoman GUNES

1.Introduction

My assignment is about divorce in Turkey.This topic is so important because this can happened in our lives and I try show my research about divorces in my assignment.How many people divorcing and which part of turkey divorces occuring with which reasons are some of wxamples of my investigation.I try to show this statistics in my research.

2.Methods

Some datasets between 2001 to 2007 are as follow:

- ✓ Marriages by years
- ✓ Divorces by years
- ✓ Marriage rates by years
- ✓ Divorces rates by years
- ✓ Divorce due to cheating by regions
- ✓ Divorce due to violence by regions
- ✓ Divorce due to leaves by regions
- ✓ Divorce due to mental diseas by regions

I have used some techniques for make this datas to show you easier.For example,i set the formulas in boxes for the find total scores of statistics and thus I do not need calculator.I filter my some of datas because there are much data and when I use all of datasets in charts some statistics are can be out of range.

3.Results

Results of my data shows some significant informations.When population of Turkey is raising rate of marriage-divorce not change almost.This statistic can shows despite raising population,problems in daily life are not increase with the same rate.We can be happy with this because if we keep going this side better future is waiting for us.
