ASSIGNMENTS

Assignment-02

Presentation of the studies or the models analyzed in **Assignment-01 in the seminars at the second half of the course. The presentations may include the issues as indicated in the description of Assignment-01:**

- Conceptual models of information systems,
- Practical (application) models of information systems,
- Surveys and studies on information systems and technology,
- Commercial software packages,
- In-house solutions developed by architectural design firms,
- System analysis studies or methods,
- etc.

Presentations must:

- include the comments and evaluation of the students about the study or model,
- be prepared using a presentation software such as PowerPoint,
- last 20 minutes at least,
- include the demonstration of software analyzed (if available) as well,
- be performed in time as scheduled; the final schedule including the students and topics will be announced on the WEB page.
