Special Issue
Active Faulting and Crustal Deformation in the Eastern Mediterranean Region

Selected papers from the First International Symposium on Earth Sciences and Engineering, of the Faculty of Mines, Istanbul Technical University

Tuncay Taymaz
Department of Geophysical Engineering, Istanbul Technical University, Istanbul, Turkey
E-mail: taymaz@itu.edu.tr

Rob Westaway
The Open University, Newcastle-upon-Tyne, UK
E-mail: r.w.c.westaway@ncl.ac.uk

Robert Reilinger
Department of Earth, Atmospheric, and Planetary Sciences, Massachusetts Institute of Technology, Cambridge, MA, USA
E-mail: reilinge@erl.mit.edu

CONTENTS

Editorial
Active faulting and crustal deformation in the Eastern Mediterranean region
T. Taymaz, R. Westaway and R. Reilinger .......................................................... 1

Theme 1: Regional synthesis
Origin of the Eastern Mediterranean basin: a reevaluation
Z. Garfinkel ................................................................. 11

Theme 2: Marine geophysical investigations
Neotectonic evolution of the Anaximander Mountains at the junction of the Hellenic and Cyprus arcs
Neotectonic structures in the area offshore of Alaçatı, Doğanbey and Kuşadası (western Turkey): evidence of strike-slip faulting in the Aegean extensional province
N. Ocakoğlu, E. Demirbağ and İ. Kuşçu ...................................................... 67
Variation of seismic coupling with slab detachment and upper plate structure along the western Hellenic subduction zone
M. Laigle, M. Sachpazi and A. Him .......................................................... 85
Reflection–refraction seismics in the Gulf of Corinth: hints at deep structure and control of the deep marine basin

Theme 3: Onshore investigations in western Turkey
Magnetotelluric images of the crust and mantle in the southwestern Taurides, Turkey
A. Gürer, M. Bayrak and Ö.F. Gürer .......................................................... 109
Pliocene and Quaternary regional uplift in western Turkey: the Gediz River terrace staircase and the volcanism at Kula
R. Westaway, M. Pringle, S. Yurtmen, T. Demir, D. Bridgland, G. Rowbotham and D. Maddy ........ 121
A pulsed extension model for the Neogene–Recent E–W-trending Alâşehr Graben and the NE–SW-trending Selendi and Gürdes Basins, western Turkey
M. Purvis and A. Robertson .......................................................... 171
**Theme 4: Structural complexities associated with strike-slip faulting**
Kinematic consistency between the Dead Sea Fault Zone and the Neogene and Quaternary left-lateral faulting in SE Turkey
- R. Westaway .......................................................... 203

Uplift and subsidence from oblique slip: the Ganos–Marmara bend of the North Anatolian Transform, Western Turkey

From transpression to transtension: changes in morphology and structure around a bend on the North Anatolian Fault in the Marmara region
- A.I. Okay, O. Tüysüz and Ş. Kaya ........................................ 259

Rupture progression along discontinuous oblique fault sets: implications for the Karadere rupture segment of the 1999 İzmit earthquake, and future rupture in the Sea of Marmara
- J.R. Muller and A. Aydin ................................................. 283

**Theme 5: Seismicity and microseismicity of the western North Anatolian Fault Zone**
A study of microearthquake seismicity and focal mechanisms within the Sea of Marmara (NW Turkey) using ocean bottom seismometers (OBSs)

The rupture process during the 1999 Düzce, Turkey, earthquake from joint inversion of teleseismic and strong-motion data
- N. Umutlu, K. Koketsu and C. Milkereit ..................................... 315

Spatial variation of aftershock activity across the rupture zone of the 17 August 1999 İzmit earthquake, Turkey

**Theme 6: Strong ground motion simulation in the Istanbul area**
Site amplification at Avılar, Istanbul
- M. Ergin, S. Özalaybey, M. Aktar and M.N. Yalçın ................................................. 335

Strong ground motion during the largest aftershock (Mw=5.8) of the 1999 İzmit earthquake, Turkey
- N.M. Özel, T. Sasatani and O. Özel ........................................... 347

Strong ground motion estimation in the Sea of Marmara region (Turkey) based on a scenario earthquake
- N. Pulido, A. Ojeda, K. Atakan and T. Kubo ...................................... 357
